

APPLICATION CASE STUDY

COMPANY DETAILS – Weiss-Aug Co., NJ.

Weiss-Aug Co. located in East Hanover, NJ, provides custom automated insert molding, precision metal stamping, and assembly solutions to a wide variety of industries throughout the world, from concept to production.

Accu-Lube PRODUCTS IN USE

Accu-Lube LB-2000 Lubricant
Accu-Lube Equipment – 2 nozzles Applicator

CUSTOMER NEEDS IDENTIFIED

Weiss-Aug was looking for a way to get away from flood coolants. In their process at that time, they were putting coolants in a spray bottle and squirting it while the machine ran. This was a very messy and inefficient process.

ACCEPTED BENEFITS

We made a demonstration with a 2 nozzle Accu-Lube applicator and the Accu-Lube LB-2000 lubricant. The first visual benefit is the cleanliness of the Accu-Lube system compared to their old process.

The Accu-Lube system has enabled Weiss-Aug Co. to extend their tool life by about 50% for that application.

VALUE TO CUSTOMER

Weiss-Aug Co. has been very satisfied with the Accu-Lube system. They have seen some substantial cost savings on coolant and tool life.

Area: New Jersey – Mauricio Lopez
